

7. Reference Hexa-Cover® Floating Cover**Application** Eluat**Effect** Controlling odorLocation Combineering AS
Denmark

Combineering is a Danish company engaged in recycling and utilization of industrial waste products. Typically in the shape of specialized waste products available in large, homogenous quantities. Combineering supplies alternative raw materials, where waste products from one industrial field can be applied as a replacement for traditional raw materials in another. Combineering buys selected industrial waste products and find outlets for them in other industries.

Combineering works across a wide range of industrial fields and countries and rely on an extensive network of business contacts. In this way we ensure that our customers are offered the best possibilities for reutilization.

Combineering takes care of notifications of cross-border waste product transportations and act as a service partner in this field to a range of companies.
